The wild turkey is a difficult bird to hunt. Their field of vision is about 270 degrees. A spooked turkey can run at speeds up to 20 miles per hour. They can also burst into flight at speeds between 50-55 mph in a matter of seconds. Even with two seasons a year, only one in six hunters will get a wild turkey.

ICE LANTERNS

Fields of turkeys
dropped dead of heart
attacks when the Air
Force was conducting
test runs and breaking
the sound barrier. When Neil Armstrong
and Edwin Aldrin enjoyed their first
meal on the moon, their foil food
packets contained roasted turkey and
all of the trimmings. The Sesame Street
character Big Bird wears a costume
made of 4,000 turkey feathers
dyed bright yellow.
